# SUEZ wins contract with VinyThai to reduce water footprint and operational costs

JANUARY 6, 2022

**SUEZ - Water Technologies & Solutions (/applications/lithium-processing)** has been awarded a contract to design and build water treatment, wastewater recycle, and waste recovery systems for **VinyThai Public Company Limited (https://www.vinythai.co.th/th/home/)**, a major market leader in manufacturing plastic and chemical products in Thailand. The technologies and services will provide VinyThai with a compact solution for resource recovery, enable it to reliably and consistently meet discharge limits, and reduce its water footprint, operational costs, and risks.

The package will consist of SUEZ's **Poseidon\* Dissolved Air Flotation System (/products/flotation/poseidon-dissolved-air-flotation)**, **PROFlex\* Brackish Water Reverse Osmosis system (/products/reverse-osmosis/proflex-brackish-water-ro-and-nf)**, **ZeeWeed\* 500D Membrane Bioreactor (/products/biological/leapmbr-wastewater)**, and filter press for biological waste and polyvinyl chloride (PVC) waste. SUEZ will also provide chemical supplies, as well as plant operation and maintenance services for the next five years.

VinyThai makes essential feedstocks like Caustic Soda (sodium hydroxide), PVC resins, and bio-based Epichlorohydrin for various industries globally, including construction, coatings, automotive, electronics, and consumer goods.

“VinyThai shares the same passion for the environment, high standards for safety and health, and a commitment to innovation and operational excellence as SUEZ, making them an excellent partner,”

- Thomas Buer, Senior Vice President of ES Technologies & Systems at SUEZ Water Technologies & Solutions.
