INOVYN announces intention to invest in a new membrane cellroom at Köln, Germany

🕒 Friday, 03 November 2017

🏷️ INOVYN

INOVYN has today announced its intention to undertake a major investment in a new state-of-the-art membrane cellroom for the production of chlorine and caustic soda at Köln (Germany).

Initial design and feasibility studies are under way, with Project completion expected in 2021.

The chlorine produced in the new cellroom will mainly be supplied to INEOS Oxide to support its strategy to increase propylene oxide production at its Köln Site, whilst the caustic soda will be sold in the European market, underpinning security of supply to INOVYN's customers

This Project forms part of INOVYN's substantial chlor-alkali investment programme, which has so far included a well advanced membrane ^{EN} cellroom    conversion at Stenungsund (Sweden), as well as the recently completed expansion of its membrane chlorine cellroom at Antwerp/Lillo (Belgium) and a major investment in a large scale potassium hydroxide (KOH) production facility at the same site.

These projects complement INOVYN's existing high quality membrane based production portfolio across Europe, with assets in Belgium, France, Germany, Italy, Norway and the UK.

“Specifically, this investment is a clear sign of INOVYN’s ongoing commitment to its European caustic soda customers.”

ENDS

For editors:

INOVYN was formed on 1 July 2015, creating a PVC producer that ranks among the top three worldwide. With an annual turnover in excess of €3.5 billion, INOVYN has more than 4,300 employees and manufacturing, sales and marketing operations in ten countries across Europe.

INOVYN’s portfolio consists of an extensive range of class leading products arranged across Organic Chlorine Derivatives, Chlor Alkali, General Purpose Vinyls and Specialty Vinyls. Annual production volumes are in excess of 40 million tonnes.

INOVYN to build a new state-of-the-art membrane cellroom for the production of chlorine and caustic soda at Köln.
