A night view of Jiaxing Petrochemical's second PTA line

INVISTA's latest P8 technology sees first successful deployment in China

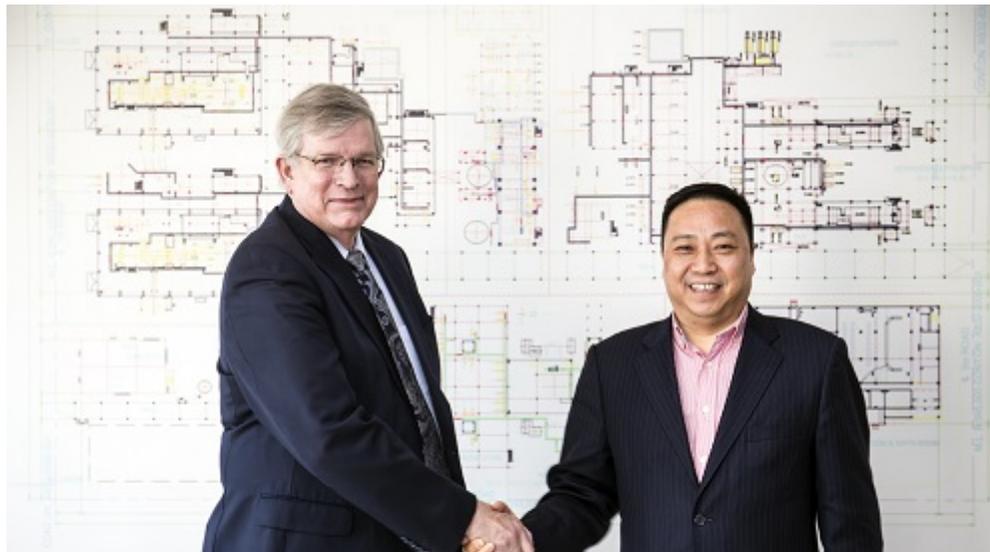

[Share](#)

SHANGHAI, China - Jan. 11, 2018 - INVISTA Performance Technologies (IPT) and Jiaxing Petrochemical Co., Ltd, a subsidiary of Tongkun Group Co., Ltd, announce the successful start-up of Jiaxing Petrochemical's second PTA Line, utilising INVISTA's latest P8 technology. The first reaction train reached 100 percent design rate in just 10 days from the first introduction of feedstock.

P8 is the very latest PTA technology platform from INVISTA, representing industry-leading capital productivity, variable cost and environmental footprint. It is the latest demonstration of INVISTA's 30-year track record in successfully deploying new generations of PTA technology that create competitive advantage for licensees.

A ceremonial session was held by Jiaying Petrochemical to celebrate the outstanding achievement. Mr. Xu, president of Tongkun Group, expressed his trust in INVISTA's PTA technology and the capability of its engineers and scientists. He said, "We are pleased to see the successful start-up of our second PTA line and the operations are currently running very well."

"We recognize that INVISTA's P8 technology is a world class PTA technology. And the successful start-up is an outcome of close collaboration between the teams of both companies. We look forward to continuous cooperation in the future." Mr. Xu added.

Mike Pickens, president of INVISTA Performance Technologies (left) and Mr. Xu, president at Tongkun Group shake hands at the ceremony.

Mike Pickens, president of INVISTA Performance Technologies, commented in his speech at the ceremony, "We are honored that the first deployment of our latest P8 technology has been in partnership with Jiaying Petrochemical and it is appropriate that they will be rewarded by the superior project returns made possible by the advanced P8 technology platform."

The achievement represents yet another major milestone for Jiaying Petrochemical and INVISTA, following the start-up of the first PTA line in 2012.

INVISTA's latest PTA technology is available as a license package from INVISTA Performance Technologies. For more information, please visit www.ipt.INVISTA.com.

About INVISTA

With leading brands including LYCRA®, COOLMAX®, CORDURA®, STAINMASTER® and ANTRON®, INVISTA is one of the world's largest integrated producers of chemical intermediates, polymers and fibers. The company's advantaged technologies for nylon, spandex and polyester are used to produce clothing, carpet, car parts and countless other everyday products. Headquartered in the United States, INVISTA operates in more than 20 countries and has about 10,000 employees. For more information, visit INVISTA.com, Facebook.com/INVISTAglobal and Twitter.com/INVISTA.
