

RELIANCE EXPANDS FEEDSTOCK SUPPLY OPTIONS FROM NORTH AMERICA FOR ITS CRACKERS IN INDIA

Mumbai, August 20, 2014: The Shale Gas industry, in North America has grown exponentially in the past 5 years. As a result Ethane has become the dominant feedstock for crackers replacing liquids. Reliance's investments in Shale Gas and its existing crackers portfolio in India are a natural fit for sourcing Ethane from North America and shipping it to India to attain long term feedstock competitiveness.

Reliance is implementing a project to source 1.5 MMTPA of Ethane from US to feed its crackers in India.

Reliance has now executed storage and capacity agreements for liquefaction and export of ethane with a North American Terminal, which is expected to commence operations in the second half of 2016.

For the purpose of transporting liquefied ethane to India in a safe and cost efficient manner, Reliance has ordered six state-of-the-art Very Large Ethane Carriers (VLECs) which will be the largest vessels ever built in the world. The ships are expected to be delivered starting last quarter of 2016 in synchronisation with the readiness of terminal in North America.

Reliance is also building a world-scale receiving and storage facility in India for liquefied ethane and pipeline to deliver ethane to our crackers.

Reliance will be upgrading its crackers to maximize cracking of Ethane, have maximum operational flexibility and capability to optimize feed stocks with complete control of supply chain.

The project will significantly improve the long term competitiveness of our cracker portfolio through dedicated feedstock, enhanced margins, higher capacity and end-to-end integration.

About RIL

Reliance Industries Limited (RIL) is India's largest private sector company, with a consolidated turnover of ₹ 4,46,339 crore (US\$ 74.5 billion), cash profit of ₹ 33,980 crore (US\$ 5.7 billion) and net profit of ₹ 22,493 crore (US\$ 3.8 billion) for the year ended March 31, 2014.
