

TPU FOR HOTMELT ADHESIVE

Characteristics

SHEENTHANE® AH series have outstanding bonding capabilities with a variety of materials, such as TPU, PVC, Nylon, Polyester, leather, oily leather, and so on. The non-yellowing type, polyester type and polyether type are all available. Customization service is included based upon different levels of melt flow index.

Application

SHEENTHANE® AH series are highly suitable for the footwear industry, such as counters & toe puffs, the textile industry such as fabrics lamination, and the automotive industry. Also, they are perfect for hotmelt adhesive membrane, seam sealing tape, and heat transfer lamination.
