

TPU FOR INJECTION

Characteristics

These series resins have many outstanding attributes, such as good abrasion resistance, oil resistance, low temperature flexibility, and elasticity. Furthermore, they have a variety of unique types, such as little yellowing grade, non-yellowing grade, transparent grade, good abrasion resistance grade, low compression set grade, phenol-free grade, bio-based grade, etc.

Application

These series resins are perfect for soles, spikes, shoe accessories, heel tips, phone cases, watch-straps, casters, sports equipment, animal ID, o-rings, dust covers, etc.
