

TPU FOR SOLVENT BASED PU ADHESIVE

Characteristics

SHEENTHANE® AS series have many competitive advantages, including outstanding green strength, extremely fast solubility in various solvents, strong crystallization, and low thermoplasticity. Also, they could be operated as a one-component adhesive or with a crosslinking agent. Most importantly, customization service is included based upon different levels of viscosity.

Application

SHEENTHANE® AS series are highly suitable for footwear materials or accessories, garment lamination, furniture products, fire hose co-extrusion, etc. Also, they have excellent bonding capabilities with a variety of materials, such as TPU, PVC, Nylon, Polyester, fabrics, leather, and so forth.
