

[ABOUT COMPANY](#)

[PRODUCTS](#)

[ENVIRONMENT](#)

[INDUSTRIAL PARK](#)

Aldehyde chemistry

- Pentaerythritol
- Calcium formate

Light stabilisers

- TAA
- TMP
- Dastib 845
- Dastib 845 S
- Dastib 845 P

Phenolic resins

- Fenochem
- Fenokol 43
- Fenokol A
- Fenokol UA
- Novokol E
- Fenochem 507
- Fenochem SK
- Fenochem 488
- Fenochem 43 UA
- Novokol G
- Fenokol 43 EX

Other

- K-317 Accelerant
- Ekoseparol ST
- Ekorezol
- Ekohydrol
- Pure formalin (medical grade)
- Formalin, technical, non-stabilised

Calcium formate

COMPOSITION, APPEARANCE, AND PROPERTIES

Contains at least 98% of the base substance, the rest consists of a mixture pentaerythritol, dipentaerythritol and a small amount of calcium carbonate. Appearance – white to yellow, loose powder, no lumps.

QUALITY SPECIFICATION

Feature	Unit	Value
Calcium formate	wt. %, min.	98,00
Moisture	wt. %, max.	0,50

Binding specifications and analytical methods are subject to contract.

APPLICATION

In the building industry and in the production of feed mixtures, in silage, in the leather-making industry

PACKAGING

Paper bags with polyethylene lining of 25 kg, big bags of 1000 kg, bulk.

TRANSPORT

In dry, clean and covered means of transport excluding the possibility of the substance getting wet or deteriorated due to other factors.

STORAGE

Calcium formate should be stored in an indoor, dry, and clean warehouse.

PRECAUTIONS

Calcium formate is not harmful to humans. However, ingestion must be avoided. Detailed information on the product is available from Chemko,a.s.Slovakia.
