About Lubrizol CPVC

Lubrizol is a single-source provider of polymer technologies designed to solve today's toughest building and production challenges, and is an innovator and world leader in chlorinated polyvinyl chloride (CPVC) resins and compounds. Our high performance and low-combustibility CPVC technology can be found in

- [FlowGuard® pipe & fittings](#)
- [BlazeMaster® fire sprinkler systems](#)
- [Corzan® industrial systems](#)

designed for a wide variety of applications including plumbing, fire protection and industrial piping. Backed by robust research and development capabilities and the technical expertise of our piping system consultants, billions of feet of our CPVC piping systems have been installed globally.

In addition to our core brands, we provide formulations for [TempRite® material solutions](#) for non-pipe applications, including:

- Custom fabrication
- Pool and spa
- Mass transit
- Building products
- Electrical
- Window and Door Components (Fenestration)
- HVAC
- Irrigation

When specifying a pipe and fitting product for your residential or commercial project, look no further than FlowGuard® Gold pipe and fittings. Compared to copper, PE-X and PP-R, FlowGuard Gold pipe and fittings provide superior performance and material installation benefits. Learn of the advantages that [FlowGuard Gold pipe and fittings](#) can bring to your next project, compared to the competition.

Want to learn more? [Contact us](#) for more information and to find a piping system specialist.
