Acrylic Acid

ACRYLIC ACID, GLACIAL(GAA)

CAS NO:79-10-7**Molecular formula:** CH₂=CHCOOH**Synonyms:** Refined Acrylic Acid, High Purity Acrylic Acid**Technical Index:**

Item	Specification
Purity≥ ^o C(GC)	99.5
Color (APHA)≤	10
Water ≤Wt, ^o C	0.1
Furfural≤Wt, ppm	1.0
Acetic Acid≤Wt, ppm	500
Propionic Acid ≤Wt, ppm	100
Benzaldehyde≤Wt, ppm	1.0
Inhibitor (MEHQ) Wt,ppm	200+20(As agreed upon between the buyer and the seller)

Application:

ACRYLIC ACID, GLACIAL highly used in industries of super absorbent polymer, addition polymerization of macromolecular and monomer for polyelectrolyte, organic synthesis, water treatment reagent and paper-making chemicals as functional monomer.

Package:200kg/drum, ISO tank, Bulk**Other:**Please contact our sales representatives who in charge of your location to get MSDS, TDS & Sales Specification.
