CHOMARAT INCREASES ITS PRODUCTION CAPACITY IN MULTIAXIAL GLASS FIBER REINFORCEMENTS

CHOMARAT is expanding its Tunisian plant in Grombalia (30 mins. from Tunis) and has announced an increase in its production capacity of multiaxial glass fiber reinforcements for the wind turbine market. These investments come in response to a new contract to supply over 10,000 tonnes to the wind turbine sector. In 2014 CHOMARAT made similar improvements to its Taicang plant (near Shanghai) in China. The Group is now able to supply its multiaxial reinforcements across continents – Europe, Asia and the Americas. The aim of the Group is to pursue its development by offering a competitive range designed for the wind turbine sector and all other high-volume markets such as the transportation and marine industries.

Agenda

[JEC EUROPE PARIS 2015](#)

March, 10-12, 2015 / Paris, France
Hall 7.3 stand M29

[TECHTEXTIL FRANCFORT](#)

May, 4-7, 2015 / Francfort, Germany

[SAMPE BALTIMORE](#)

May, 18-21, 2015 / Baltimore, Maryland, USA
Booth F49

[SAMPE CHINA 2015](#)

May, 27-29, 2015 / Beijing, China
Booth B177

[JEC AMERICAS HOUSTON](#)

June 2-4, 2015 / Houston, USA
Booth 1532

[China Composites Expo 2015](#)

Sept 2-4, 2015 / Shanghai, China

Booth 318

[COMPOSITES EUROPE STUTTGART](#)

Sept. 22-24, 2015 / Düsseldorf, Germany

Booth 5/D38

[CAMX 2015](#)

Oct. 26-29, 2015 / Dallas, TX, USA

Booth U78

[COMPOSITES ENGINEERING UK 2015](#)

Nov. 4-5, 2015 / Birmingham, UK

Booth D206
