

## Ground Coconut Shell Reinforced

---

### General

Coconuts are a multi-use staple product grown around the world. We utilize ground shells from a producer in Asia. After all the food products and husks are removed the shells are either discarded for natural decomposition or burned to produce charcoal. We utilize both fine and course ground coconut shell to produce polypropylene compounds.

### Characteristics

- **Surface Hardness**
- **Stiffness**
- **Dimensionally stable**
- **Very low moisture absorption**
- **Lower specific gravity than minerals**
- **Deep brown natural color**
- **Excellent chemical and mold resistance**
- **Mineral replacement**
