PlasChem Park in Jubail

Sadara and the Royal Commission for Jubail and Yanbu are collaborating to establish a world-class industrial park for chemical and conversion industries. Called PlasChem Park, the twelve square kilometer site in Jubail Industrial City II is located next to Sadara's new manufacturing complex and will be devoted exclusively to chemical and conversion industries that make direct or indirect use of Sadara's products and raw materials from other suppliers. The site will consist of two main sections: the Chemical Park and the Conversion Park.

Automotive Industry Applications

- Brake fluids
- Adhesives / sealants
 - Tires
 - Spare parts
- Aftermarket products

- Internal lining, seats, soft touch surfaces

Construction Chemicals / Products

- Adhesives / sealants
 - Roof membranes
- Concrete additives / plasticizers
- Insulation materials – foams, mineral fibers
- Industrial flooring materials (epoxy, polyurethane)

Home & Personal Care

- Detergents
- Cleaning fluids
- Surfactants / soaps
 - Emulsifiers
 - Shampoos
 - Cosmetics

Pharmaceutical Products

- Prescription drugs
 - OTC products
- Containers and packaging

Paints & Coatings

- Powder coatings
- Industrial paints

Alternative Energy

- Photo-voltaic panels / technologies
- Concentrated solar technologies
- Wind energy applications

Water, Power, Oil & Gas Chemicals

- Gas separation
- Emulsifiers & demulsifiers
 - Drilling muds
- Reverse osmosis membranes
 - Anti-corrosion
 - Anti-scalants
 - Anti-microbial
- Ion-exchange resins

Consumer Goods & Appliances

- Refrigerators
- Washing machines
- Air conditioning units
- Furniture (sofas, chairs)
 - Mattresses
- Packaging / films
- Hygiene films (diapers, etc.)
 - Medical applications
 - Food packaging films

SADARA'S DIFFERENTIATED FEEDSTOCK

Sadara will be the first chemical company in the countries of the Gulf Cooperation Council (GCC) to use naphtha as a liquid feedstock. This will open the door for many exciting, new molecules that will result in many new downstream applications.

PLASCHEM PARK OPPORTUNITIES

Sadara's products will complement inputs available locally from other petrochemical projects in Saudi Arabia and will enable downstream industries based on polyurethane, amines, solvents, polyethylene, propylene glycol and other products.
