Noble Metal catalyst [NMC™]

- One of the renowned manufacturer and a reliable partner for our customers for Precious metal products.
- Complete in-house development of various catalyst grades and chemicals.
- Highly integrated manufacturing plant with a manufacturing capacity of 50 MT /Anum of Precious metal catalysts.
- An efficient recovery & security system ensures that we offer the best recoveries of precious metals from used catalyst to our customers.
- Well equipped R&D would ensure the leading position in Indian market in short period.

In spite of being a new entrant in the Noble Metal Catalyst business, we can boast of one of the best recovery results for regaining of noble metal from used catalysts. It's a matter of pride that the technology to manufacture the catalyst is developed in-house and the products are acclaimed by our customers. We are currently concentrating our energies on enhancing capacities and building a high-tech plant for the manufacture and recovery of precious metals and catalysts.
