## ELECTRONIC CHEMICALS

### Chemicals for Electronic And Engineered Applications

Next-generation Technologies Benefit Customers and Society

OM Group's Electronic Chemicals business does much more than supply superior specialty chemicals and engineered coatings; we deliver solutions. Our chemists and engineers have the experience and expertise to develop the technology, processes and custom formulations you need.

OM Group Electronic Chemicals offers a broad line of proprietary chemicals formulated for use in the Printed Circuit Board, Memory Disk, Electronic Packaging and Finishing, General Metal Finishing and Photovoltaic Industries. We are the leader in supplying electroless nickel coatings to the Memory Disk industry. We strive to develop and market environmentally sound products that help our customers achieve their sustainability objectives and comply with a variety of regulatory requirements.

OM Group is dedicated to helping you improve your product performance while creating efficiencies that can lower production costs. Our worldwide network includes manufacturing, product development and technical support centers in the US, Malaysia, Taiwan, Singapore and China, allowing us to respond quickly to customer needs.

OM Group's commitment to quality extends to our concern for the world around us. Our operations are certified to conform to the ISO9001 quality management system standard, and many are certified under the ISO14001 environmental management system standard. We will meet our commitment through continuous improvement in safety, health, environmental, and product stewardship performance.
