Lubricants

NFS-GumboFree™

- [MSDS](#)
- [Product Data](#)

NFS-GumboFree™ is a unique blend of anionic and non-ionic active surfactant, designed to reduce interfacial tension between water, solids and clay in all types of aqueous fluids. GumboFree is a great clay inhibitor that can help minimize bit balling during the drilling of massive gumbo shale.

NFS-Lube®

- [MSDS](#)
- [Product Data](#)
- [Case History](#)

NFS-Lube® is a proprietary blend of the lubricants, designed to provide lubricity to all types of water base fluids. NFS-Lube was designed with the environment in mind, so it can be used safely and effectively in both onshore and offshore wells.
