The Company

CEPSA Química Montréal (CQM), formerly Interquisa Canada, was established in 2000 as a joint venture between Société générale de financement and CEPSA (Spain). Founded in 1929, the CEPSA Group is the second largest oil company in Spain, with 11,000 employees.

Our plant employs over 140 specialists, engineers, technologists and technicians, who manage the production and marketing of over 500,000 metric tons of PTA per year. Our work methods are notable for a number of reasons, including our compliance with French-language standards, our innovative spirit and our efforts to promote sustainable development, as well as our internationally recognized health and safety management system. In addition, our outstanding environmental values have won us a number of awards, including one for our in-plant biogas recovery project.

Our mission and values

We are committed to providing our clients with outstanding service and products that meet all of their requirements, while maintaining a level of profitability that ensures our sustained development within a safe and stimulating work setting.

Our development and success are based on values that focus on:

Environmental responsibility

Health and safety concern

Continuous improvement

Teamwork

Trust

Commitment

Flexibility
