[Levulinic Acid](#) **[Applications](#)** [By-products](#) [Biofuels](#)

Applications

Biobased levulinic acid produced by GFBiochemicals not only has a more favorable profile for the environment but also enables the opportunity to create more sustainable end-products.

Levulinic acid is a starting material for a wide number of compounds and offers useful applications in many market segments:

- Pharmaceuticals
- Agrochemicals
- Flavors and Fragrances
- Personal care
- Food additives
- Resins and Coatings
- Plasticizers
- Solvents
- Fuel additives
- Biofuels
