

**Mexichem opens new manufacturing plant in India.  
(2015-05-12 )**

Mexichem, S.A.B. de C.V. Announced today that one of its subsidiaries, Dura-Line Corporation, has commenced production at a new plant in Hyderabad, India.

The new plant will produce cable ducts and pressure pipes for the water, datacom and gas markets. The new plant is Mexichem's fourth plant in India, with two other facilities located in Goa, and another in Neemrana, near Dehli.

The location of the Hyderabad plant in South India will allow Mexichem to strategically position itself for exports to Southeast Asia, to serve customers in South India and to capture new business opportunities in the region.

The opening of this plant is part of the Company's continued strategy of becoming a global, vertically integrated chemical company with a focus on high-end specialized products and solutions.
