- The acquisition is a further step in developing INEOS Enterprises sulphur chemicals portfolio by expanding sulphur dioxide and sodium based derivatives in North America.
- Calabrian is an innovative sulphur technology leader providing environmental and supply chain solutions for customers in the water, mining and oilfield markets.
- Calabrian owns a proprietary technology, SO₂Clean™, which offers competitive advantages because of its low cost, environmental profile, low capital, and modular design.
- Calabrian has two production facilities in North America with a total capacity of ~200,000 tonnes/year. The facilities are located in Port Neches, Texas and Timmins, Ontario. The Timmins plant is scheduled to begin production at the end of 2016.
- Ashley Reed, CEO of INEOS Enterprises said, **"The assets are ideally positioned to competitively serve the North American market. It will also complement our existing sulphur chemicals portfolio."**

INEOS Enterprises today announced it has acquired 100% of the shares of Calabrian Holdings Corporation, a technology and market leader of sulphur dioxide and sodium based derivatives in North America. The company has production located in Texas and is currently building a facility in Ontario.

The Calabrian plant in Texas is the largest producer in North America of SO₂ [and sodium based derivatives]. The operation in Ontario Canada will add an additional 35,000 tonnes of capacity once completed at the end of 2016.

The acquisition will add a North American dimension to INEOS' existing sulphur chemicals portfolio.

Randy Owens, CEO of Calabrian Corporation said, **“The Company has undergone significant transformation during SK Capital’s ownership. INEOS’ global infrastructure will allow the next phase of growth by accelerating geographical expansion and further advancing its technology strategy.”**

Completion of the transaction took place at the end of July.

The purchase price was not disclosed.

ENDS.

Note to editors

*SO₂Clean™ is an innovative technology developed by Calabrian Corporation to manufacture sulphur dioxide (SO₂) and various sulphur derivatives. The technology’s modular design is ideal for in-situ manufacturing of SO₂.

Key Benefits:

- SO₂Clean™ has a +98% annual on-stream time.
 - The installed cost of a SO₂Clean™ unit is less than half of an equivalent burner...less equipment and steel.
 - Electricity costs are less than 1/3 of those of a sulphur burner.
