The Chemours Company

Investor Meetings

September 2016

Safe Harbor Statement

This presentation contains forward-looking statements, which often may be identified by their use of words like “plans,” “expects,” “will,” “believes,” “intends,” “estimates,” targets,” “anticipates” or other words of similar meaning. These forward-looking statements address, among other things, our anticipated future operating and financial performance, business plans and prospects, transformation plans, resolution of environmental liabilities, litigation and other contingencies, plans to increase profitability, our ability to pay or the amount of any dividend, and target leverage that are subject to substantial risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Forward-looking statements are not guarantees of future performance and are based on certain assumptions and expectations of future events which may not be realized. The matters discussed in these forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those projected, anticipated or implied in the forward-looking statements, as further described in our filings with the Securities and Exchange Commission, including our annual report on Form 10-K for the fiscal year ended December 31, 2015. Chemours undertakes no duty to update any forward-looking statements.

This presentation contains certain supplemental measures of performance that are not required by, or presented in accordance with, generally accepted accounting principles in the United States (“GAAP”). These Non-GAAP measures include Adjusted Net Income (Loss), Adjusted EPS, Adjusted EBITDA and Free Cash Flow, which should not be considered as replacements of GAAP. Free Cash Flow is defined as Cash from Operations minus cash used for PP&E purchases. Further information with respect to and reconciliations of such measures to the nearest GAAP measure can be found in the appendix hereto.

Management uses Adjusted Net Income (Loss), Adjusted EPS, Adjusted EBITDA and Free Cash Flow to evaluate the Company’s performance excluding the impact of certain non-cash charges and other special items in order to have comparable financial results to analyze changes in our underlying business from quarter to quarter.

Historical results prior to July 1, 2015 are presented on a stand-alone basis from DuPont historical results and are subject to certain adjustments and assumptions as indicated in this presentation, and may not be an indicator of future performance.

Additional information for investors is available on the company’s website at investors.chemours.com.

The Chemours Company at a Glance

Chemours™

Sales[1]:	**$5,526**
Adj. EBITDA[1]:	**$616**
% margin:	***11%***

Titanium Technologies

Sales[1]:	$2,322
Adj. EBITDA[1]:	307
% margin:	*13%*

- Titanium dioxide (TiO_2) is a pigment used to deliver whiteness, opacity, brightness and protection from sunlight
- ***#1 global producer of TiO_2 by capacity, sales and profitability***

Fluoroproducts

Sales[1]:	$2,194
Adj. EBITDA[1]:	361
% margin:	*17%*

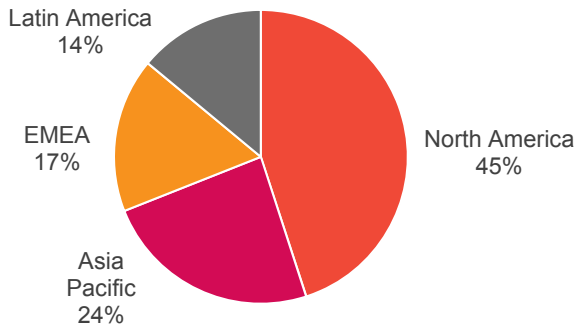
- Products for high performance applications across broad array of industries, including refrigerants, propellants and industrial resins
- ***#1 global producer of both fluorochemicals and fluoropolymers***

Chemical Solutions

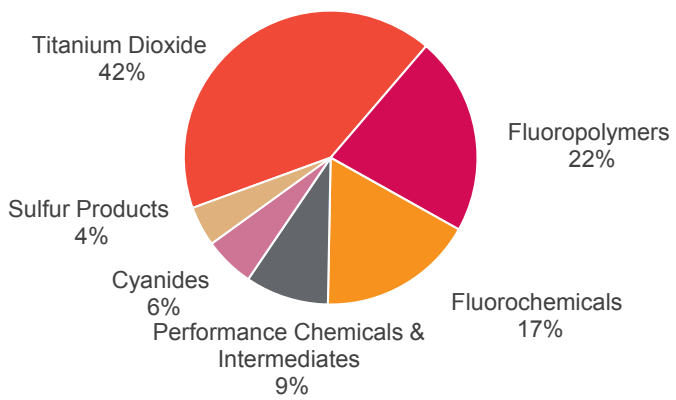
Sales[1]:	$1,010
Adj. EBITDA[1]:	45
% margin:	*5%*

- Chemicals used in gold production, oil refining, agriculture, industrial polymers and other industries
- ***#1 producer in Americas of sodium cyanide***

By Geography[2]



By Product[2]



Chemours™

Dollars in millions

[1] Data represents last twelve months ending June 30, 2016

[2] Geographic and product data reflect full year 2015 net sales; does not reflect impact of divestitures

Adjusted EBITDA includes corporate and other charges which are not reflected in individual segment Adjusted EBITDA. See reconciliation of Adjusted EBITDA in Appendix.

Transformation Plan Priorities

Reduce Costs

- Achieved cost reductions of ~$100M in first half of 2016
- Anticipating $200M of cost reductions to be realized in 2016 over 2015
- Targeting additional cost reduction of $150M in 2017

Optimize The Portfolio

- Completed strategic review of Chemical Solutions segment
- Closed Aniline, Sulfur and Clean & Disinfect sales, generated ~$695M in gross proceeds
- Retaining and improving cost position of Belle, WV site

Grow Market Positions

- Support customer growth in TiO_2 through successful Altamira start-up and disciplined approach to pricing
- Continue ramp up of Opteon™ product lines in Fluoroproducts
- Grow Cyanides business with key customers
- Target $150M Adjusted EBITDA growth from Opteon™ and Altamira through 2017

Refocus Investments

- Concentrate capital spending on investable business portfolio
- Announced investment in the next increment of Opteon™ capacity
- Rationalize annual capital spending to ~$350M over time

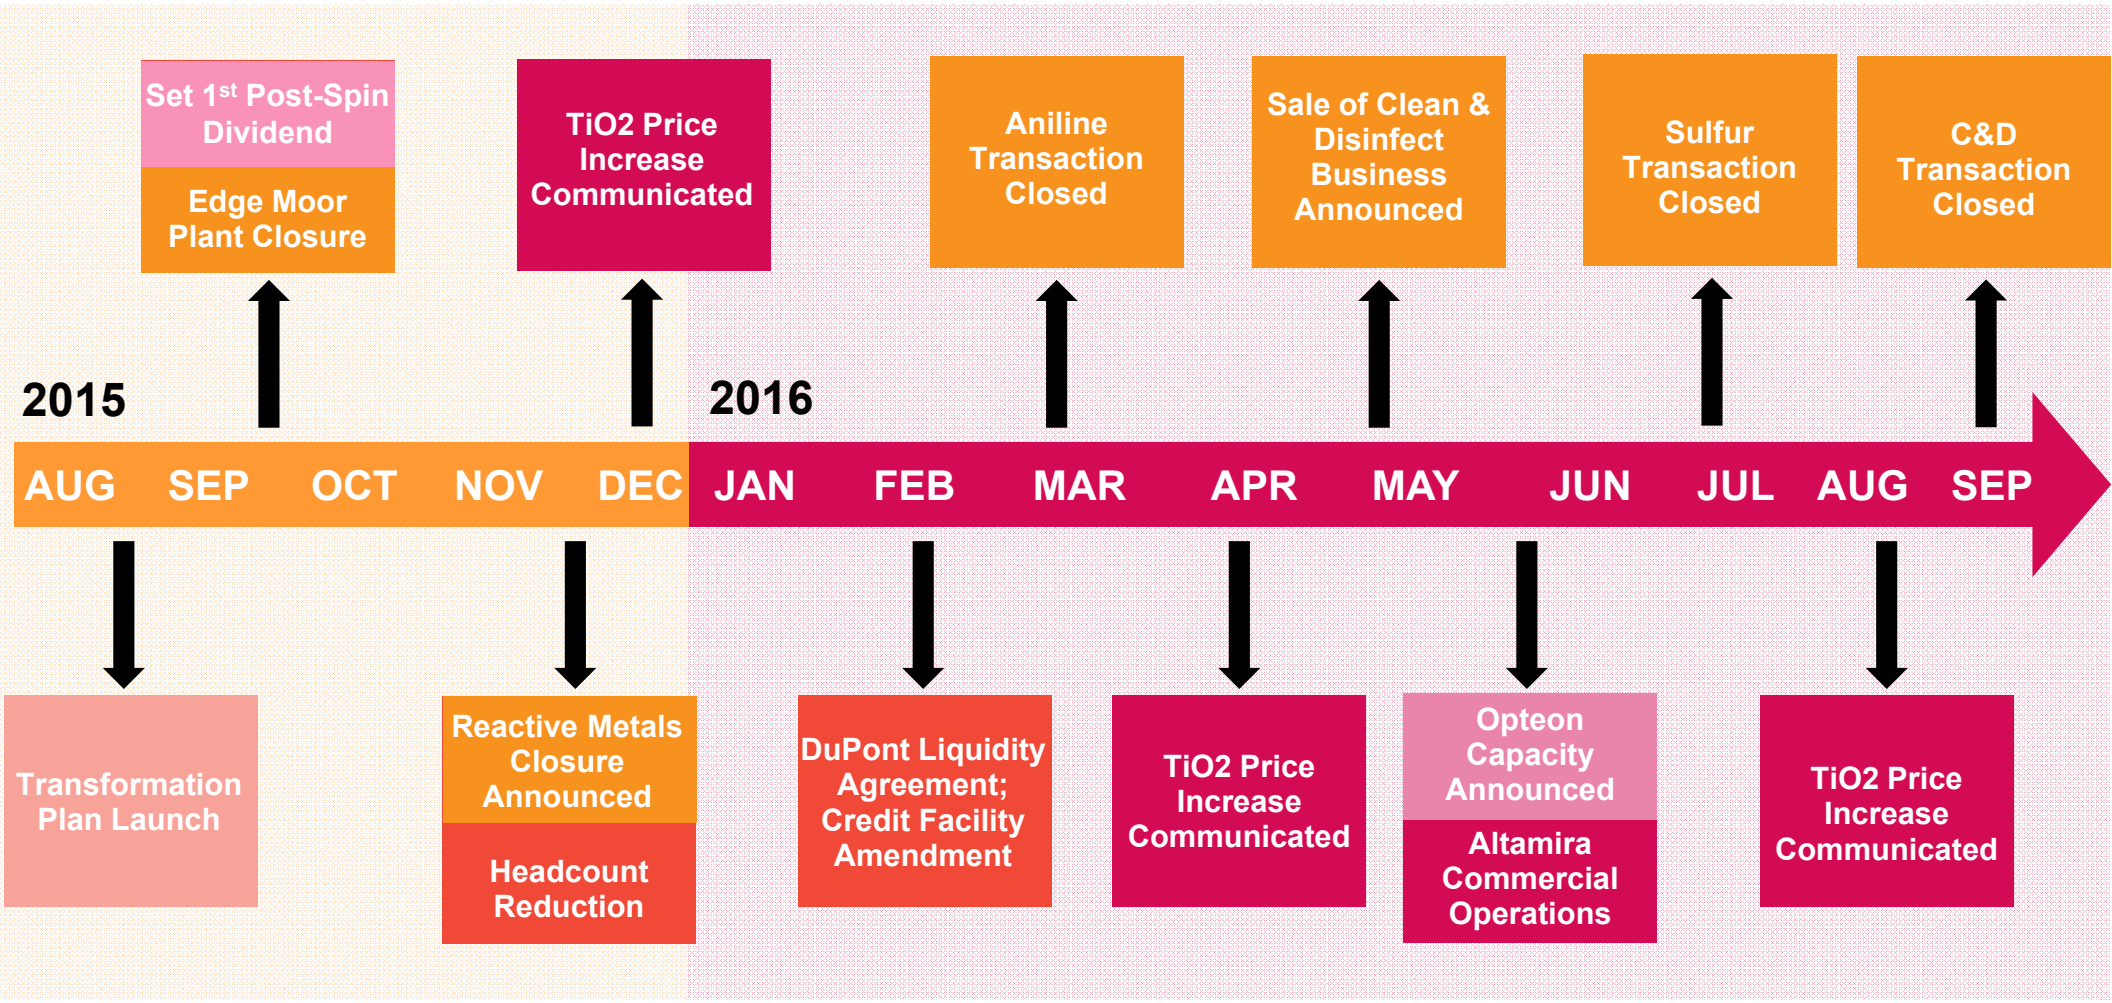
Enhance Our Organization

- Foster an entrepreneurial organization
- Operate with a simpler structure
- Maintain a commitment to a safe and sustainable future

Plan Well Underway to Enhance Adjusted EBITDA by $500M, Improve Free Cash Flow and Reduce Leverage to ~3x in 2017

Chemours™

A Year of Transformation



Chemours™

Chemours™

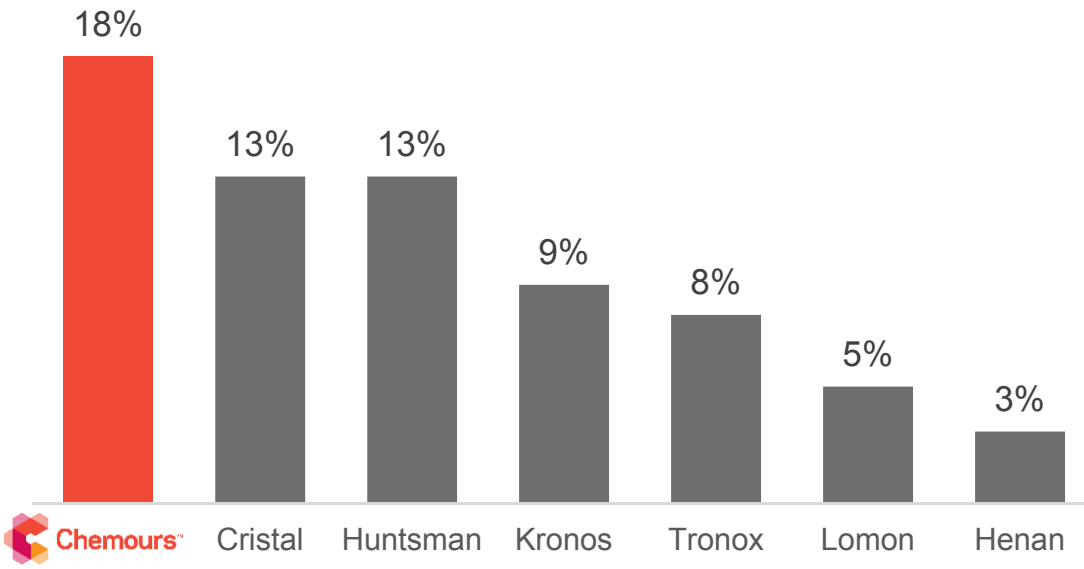
Titanium Technologies

Chemours Titanium Technologies Business Overview

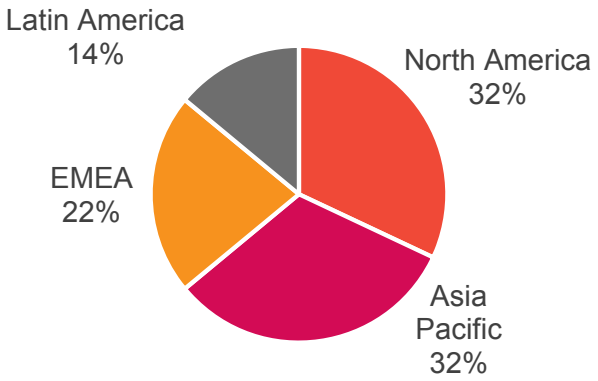
Business Overview

- Global leader in TiO_2 with production capacity of 1.25 million metric tons(1)
  - 4 TiO_2 plants with 7 production lines(1)
  - Packaging facility at Kallo, Belgium
  - Mineral sands mine at Starke, FL
- Industry-leading manufacturing cost position
  - Unique chloride technology
  - Feedstock flexibility
- Strong brand reputation
  - Ti-Pure™ sold to ~800 customers globally

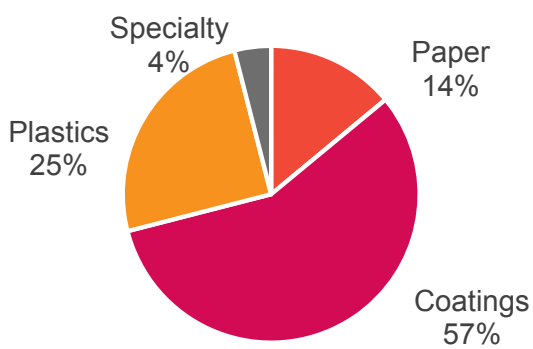
Chemours is #1 in TiO_2 Globally(2)



Geography(3)



End Market(3)



- **Coatings** – architectural, industrial, automotive
- **Plastics** – rigid / flexible packaging, PVC pipe/windows
- **Papers** – laminate papers, coated paper/paperboard, sheet
- **Specialty** – rubber, leather, diesel particulate filters

Source: Company filings and data. Titanium Technologies: TZMI (2015)

(1) Pro forma for completion of Altamira expansion

(2) TiO_2 market share statistics based on volume statistics from company filings and market estimates

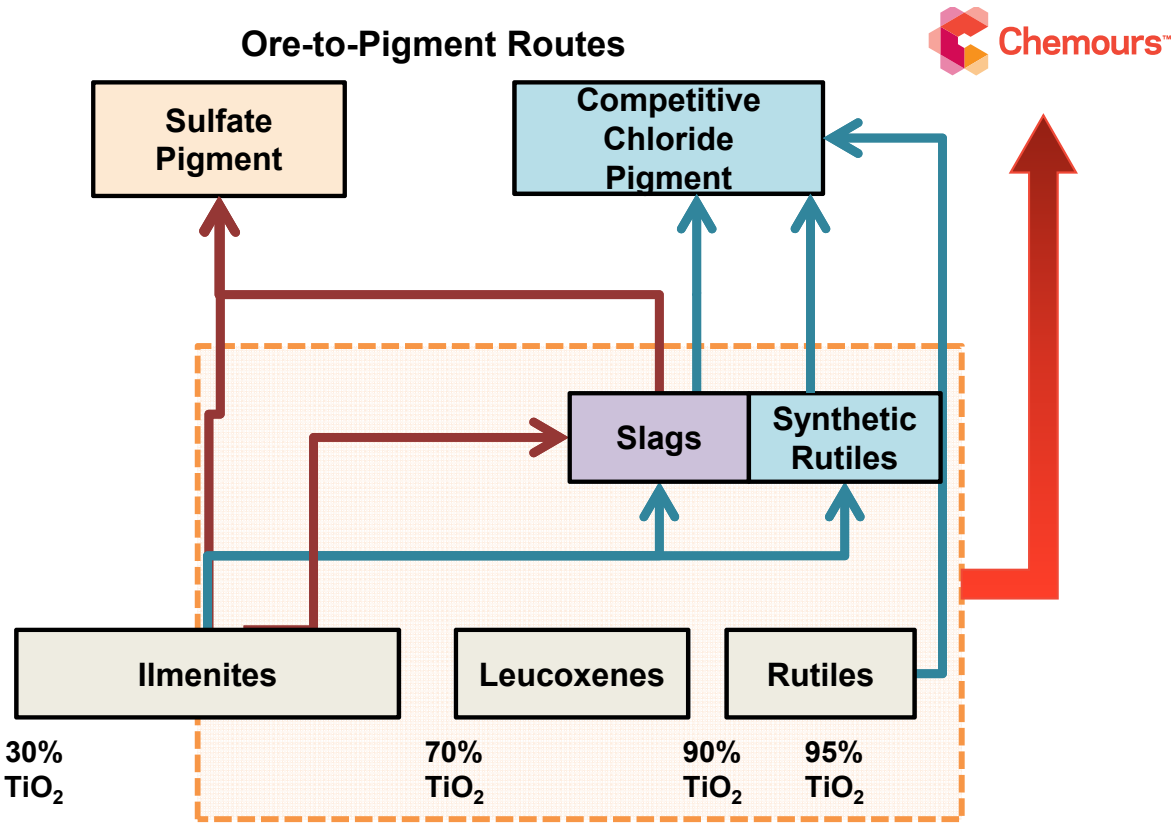
(3) Reflects full year 2015 segment net sales

Chemours™

TiO_2 Process Technologies & Chemours Capabilities

Chemours has scale, leading process technology and manufacturing flexibility creating a sustainable low-cost position adaptable to customer needs and market conditions

TiO2 Process Technologies



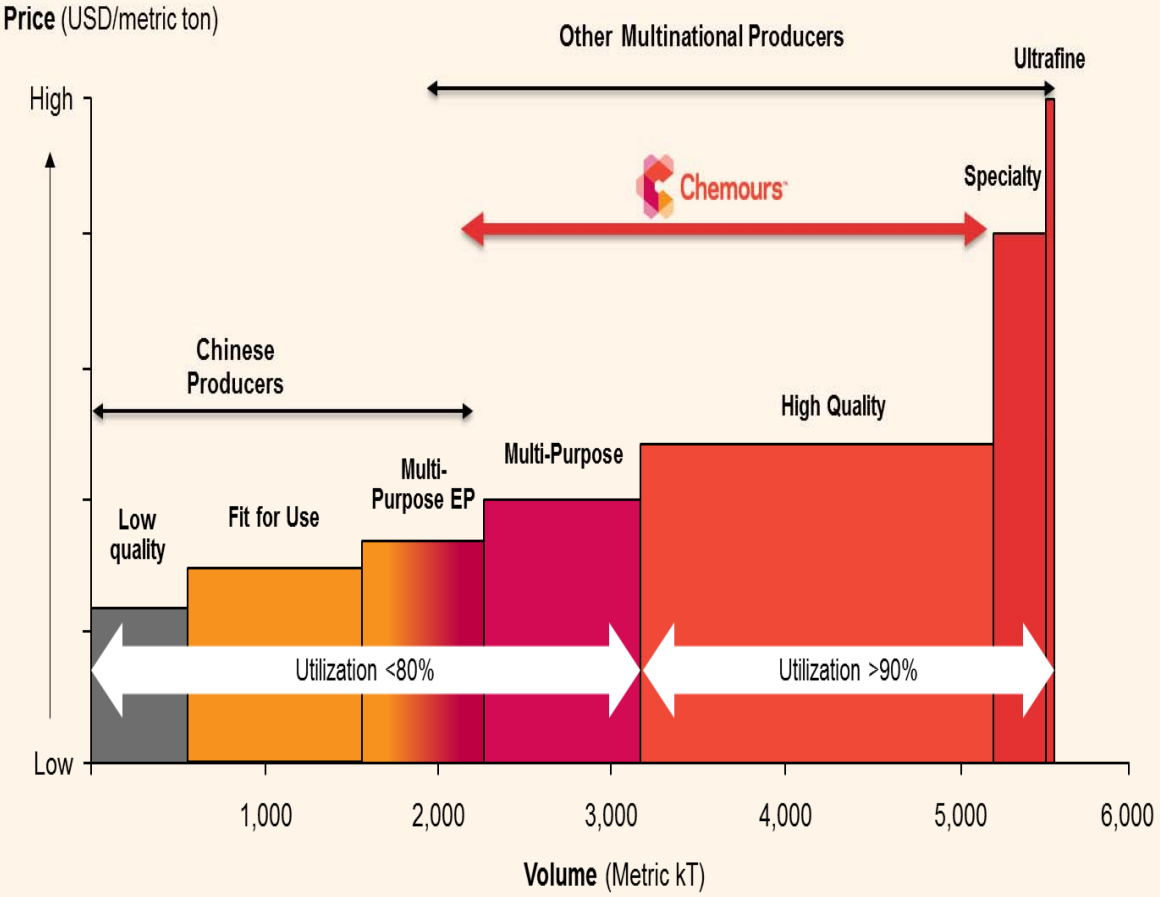
The Chemours Advantage

- 100% chloride process
- Highest throughput operations
- Process technology and operational discipline
- Flexible manufacturing circuit with sustainable expansion options

Chemours™

TiO_2 Market Segments Addressed by Producers

Chemours delivers high-quality product to serve customers in attractive higher value-add segments of the TiO_2 market



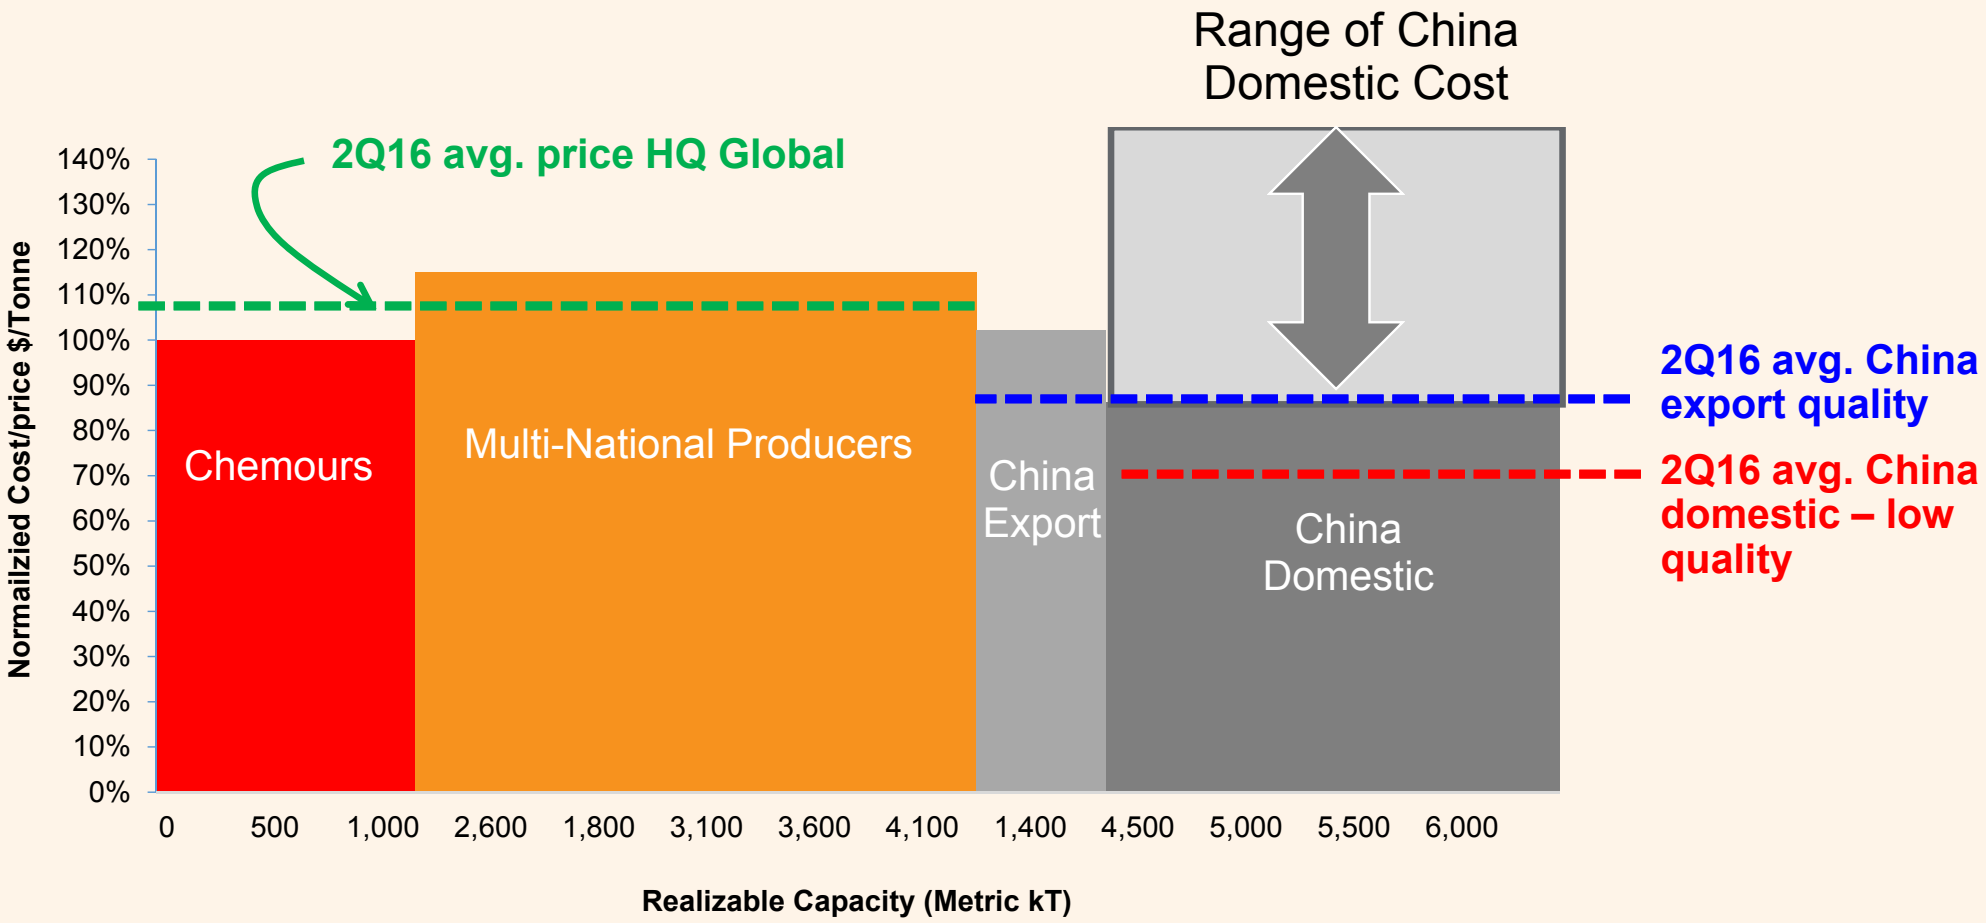
- Quality and performance of TiO_2 products differ considerably across market segments and applications
- Segments are supplied by two manufacturing systems (Regional and Multinational Producers)
- Utilization is higher at manufacturing facilities supplying specialty and higher value pigment segments
- Separation remains in multi-purpose segments based on pigment quality, product design and supply capability

Source: Chemours Estimates

Chemours™

TiO_2 Market: Cost Differentials

Chemours' product value and cost offer supply security in a stressed TiO_2 industry



Source: Chemours estimates based on internal calculations; price estimates from industry sources

Chemours™

Chemours' Profitability Focus in TiO_2

Working towards improving profitability that supports sustainable reinvestment levels

Pricing Actions

- January 1 price increase – implemented across the globe
- May 1 increase – implemented across the globe
- Announced September 1 price increase of $150/t in EMEA and Latin America
- Chemours applies an analytical approach to pricing and will seek prices consistent with factors such as:
  - Product value
  - Supply/Demand
  - Reinvestment economics

Cost Reductions

- Shutdown of Edge Moor plant and line at New Johnsonville, TN
- Integrated ore capability – from sourcing to use
- Fixed cost and working capital reductions as part of Transformation Plan

Chemours™

Chemours™

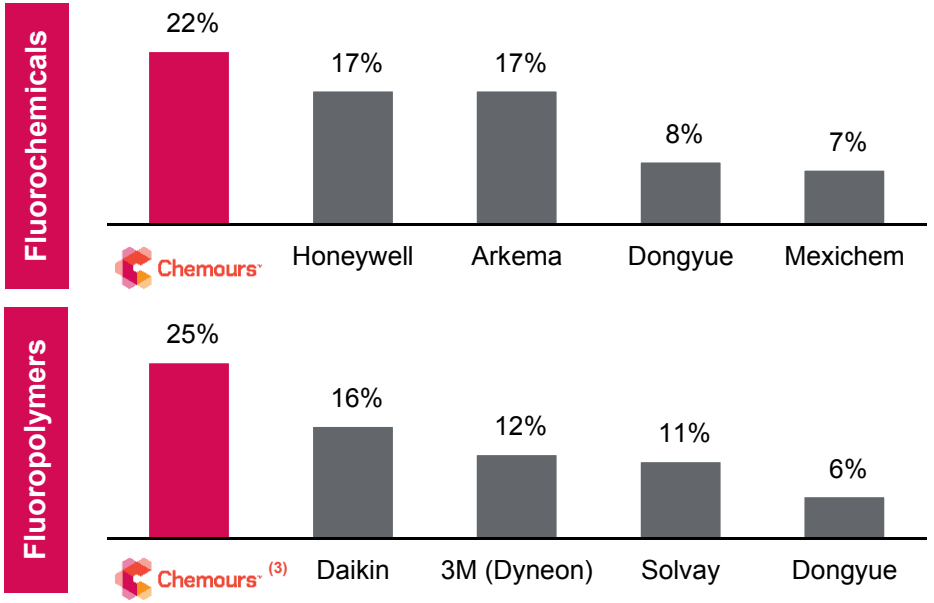
Fluoroproducts

Fluoroproducts Business Overview

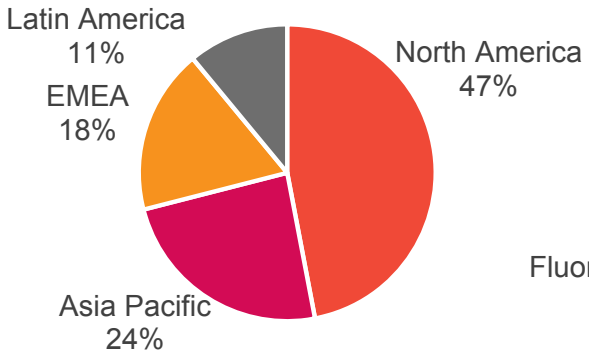
Business Overview

- Supplies products for high performance applications across broad array of industries
- #1 in Fluoroproducts globally
  - Fluorochemicals: #1 in refrigerants, #1 in propellants, #3 in foaming agents
  - Fluoropolymers: #1 in industrial resins, #1 in fluoropolymer specialties
- Key Brands include Teflon™, Freon™, Opteon™, Krytox ™, Nafion™, Viton™

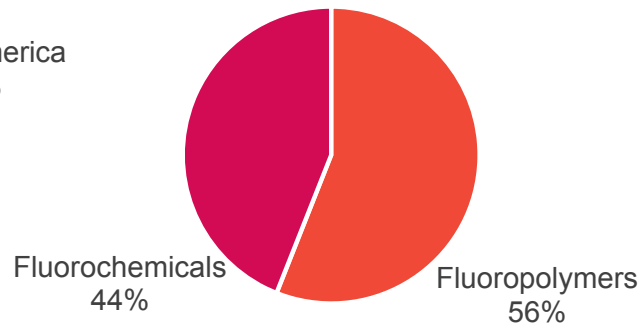
Chemours is #1 in Fluoroproducts Globally(2)



Geography(1)



Product(1)



- **Fluorochemicals –** mainly refrigerants, propellants, and foam expansion agent
- **Fluoropolymers –** mainly industrial resins and downstream products & coatings
- **Key End Markets** – AC, refrigeration, automotive, aerospace, wire & cable, consumer electronics and telecommunications

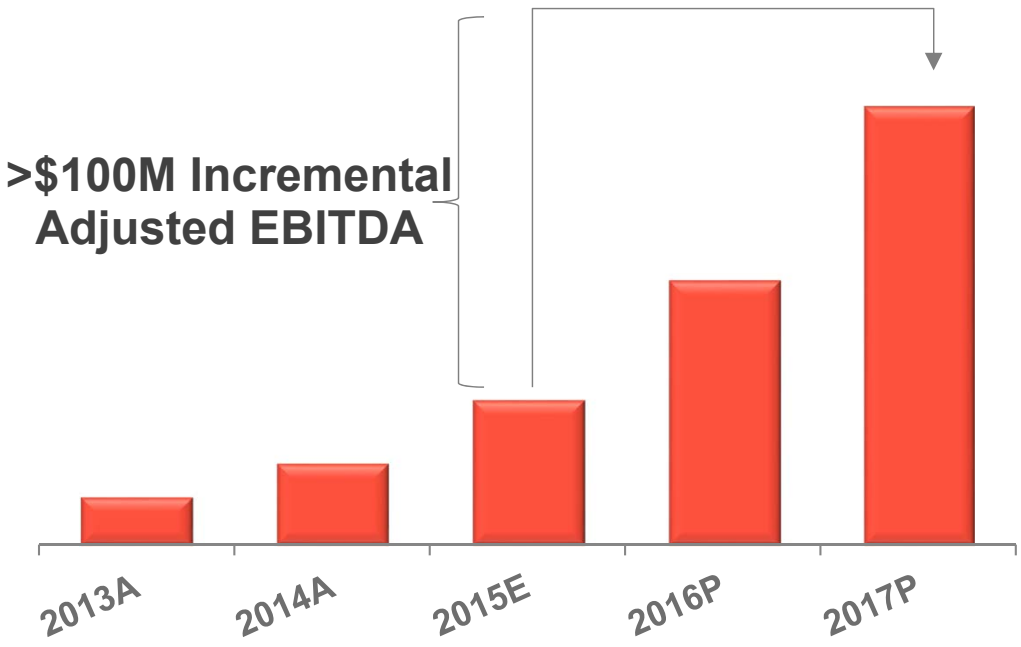
Source: Company filings and data, Fluoroproducts: Company filings and Management estimates
(1)Reflects full year 2015 segment net sales
(2)Fluorochemicals and fluoropolymers market share statistics based on 2015 internal revenue estimates and company filings
(3)Includes 100% contribution from the DuPont-Mitsui Fluorocarbon Company joint venture

Chemours™

Fast Pace Adoption of Opteon™

Opteon™ Technology offers sustainable technology option in the face of upcoming regulatory deadlines

Opteon™ Revenue Outlook



Market-Leading Portfolio

Opteon™ YF
Next Gen Gas for mobile air-conditioning

Opteon™ YF blends
Next Gen Gas for Commercial Refrigeration, Residential/Light Commercial A/C, Chillers, High Temp Heat Pump

HFO-1336(Z)
Next Gen Liquids for Foams, Centrifugal Chillers, Organic Rankine Cycles, High Temp Heat Pumps

- Opteon™ Expected to Provide >$100M of Adjusted EBITDA Growth thru 2017
- Growth beyond 2018 will be supplied by facility in Corpus Christi

Chemours™

Fluoropolymers: Tailored Solutions for Growth Opportunities

Chemours delivers high value fluoropolymer solutions used in complex and highly demanding applications

Market Dynamics

- Demand conditions driven by GDP growth in North America Europe and slower growth in China
- Weak Euro and Yen in 2015 led to pricing pressures
- Chemours' strong collaborations in automotive, telecommunications, and consumer electronics markets provide solid base of demand and growth opportunities
- Targeted innovation and application development in fluoropolymer resins and formulations expected to produce future customer solutions

Diverse End-Use Applications

Consumer Electronics – Teflon™
Faster data speeds & power/data combination cable designs

Energy Storage – Nafion™
Specialty ion exchange polymer membrane to store alternative energy in flow batteries

Turbo Charger Hoses – Viton™
Enable higher engine temperatures and advanced technology options to drive fuel efficiency improvements

Chemours™

Chemours™

Chemical Solutions

Strategic Review of Chemical Solutions Portfolio Complete

Strategic Review Results

Divest

Aniline
- Sold to Dow for ~$140 million
- Completed March 2016

Sulfur
- Sold to Veolia for $325 million
- Completed July 2016

Clean & Disinfect
- Sold to Lanxess for $230 million
- Completed September 2016

Total gross proceeds of ~$695 million - Average multiple of ~10 – 12x

Minimal net free cash flow impact

Focus to drive out stranded costs as part of Five-Point Transformation Plan

Close

Reactive Metals
- Expected end of 2016

Retain

Cyanides

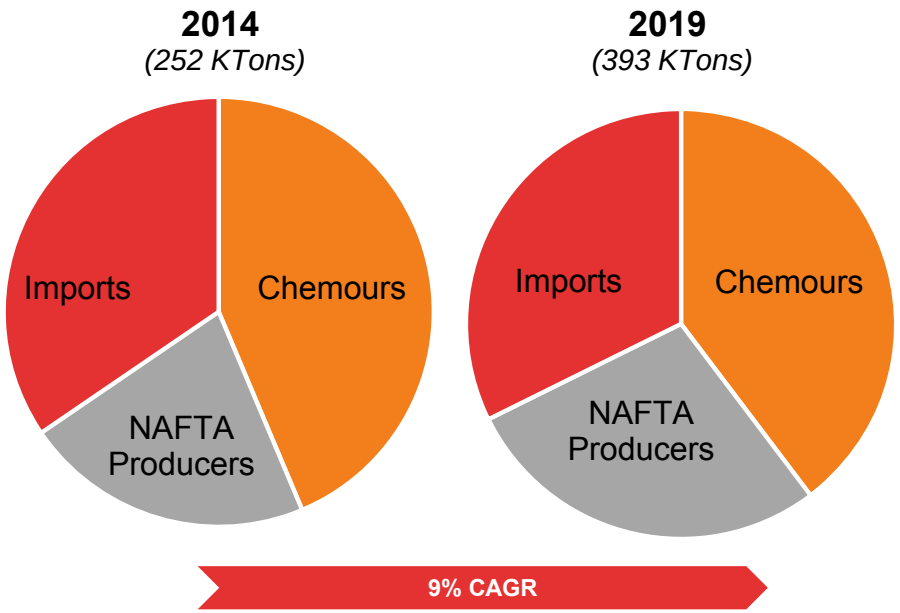
Belle, WV Site*

* Includes Methylamines, Glycolic and Vazo product lines

Chemours™

Chemours Cyanide Opportunity

Americas Sodium Cyanide Market



Americas NaCN demand forecast to grow at 9% CAGR over next four years

- Remains net import market
- Deteriorating ore quality contributes to underlying NaCN demand growth

The Chemours Advantage

- Aligned with customer values
- On-purpose producer, reliable supply
- Differentiating product stewardship
- Strong logistics network
- Long term contracts

Chemours™

Chemours™

Financial Position

2Q16 Overview

($ in millions unless otherwise noted)

Second Quarter Financial Summary

	2Q16	2Q15	Δ Yr/Yr	1Q16	Δ Seq.
Net Sales	$1,383	$1,508	($125)	$1,297	$86
Adj. EBITDA	187	127	$60	128	$59
Adj. EBITDA Margin (%)	*13.5*	*8.4*	*5.1*	*9.9*	*3.6*
Net Income (loss)	(18)	(18)	0	51	(69)
Adj. Net Income	49	17	32	11	38
EPS[1]	($0.10)	($0.10)	$0	$0.28	($0.38)
Adj. EPS[1]	$0.27	$0.09	$0.18	$0.06	$0.21
Free Cash Flow[2]	$11	($145)	$156	($219)	$230

Year-over-year

- Transformation Plan cost reductions and Opteon™ growth were partially offset by lower TiO_2 pricing and currency headwinds
- Continued meaningful improvement in Free Cash Flow performance

Sequentially

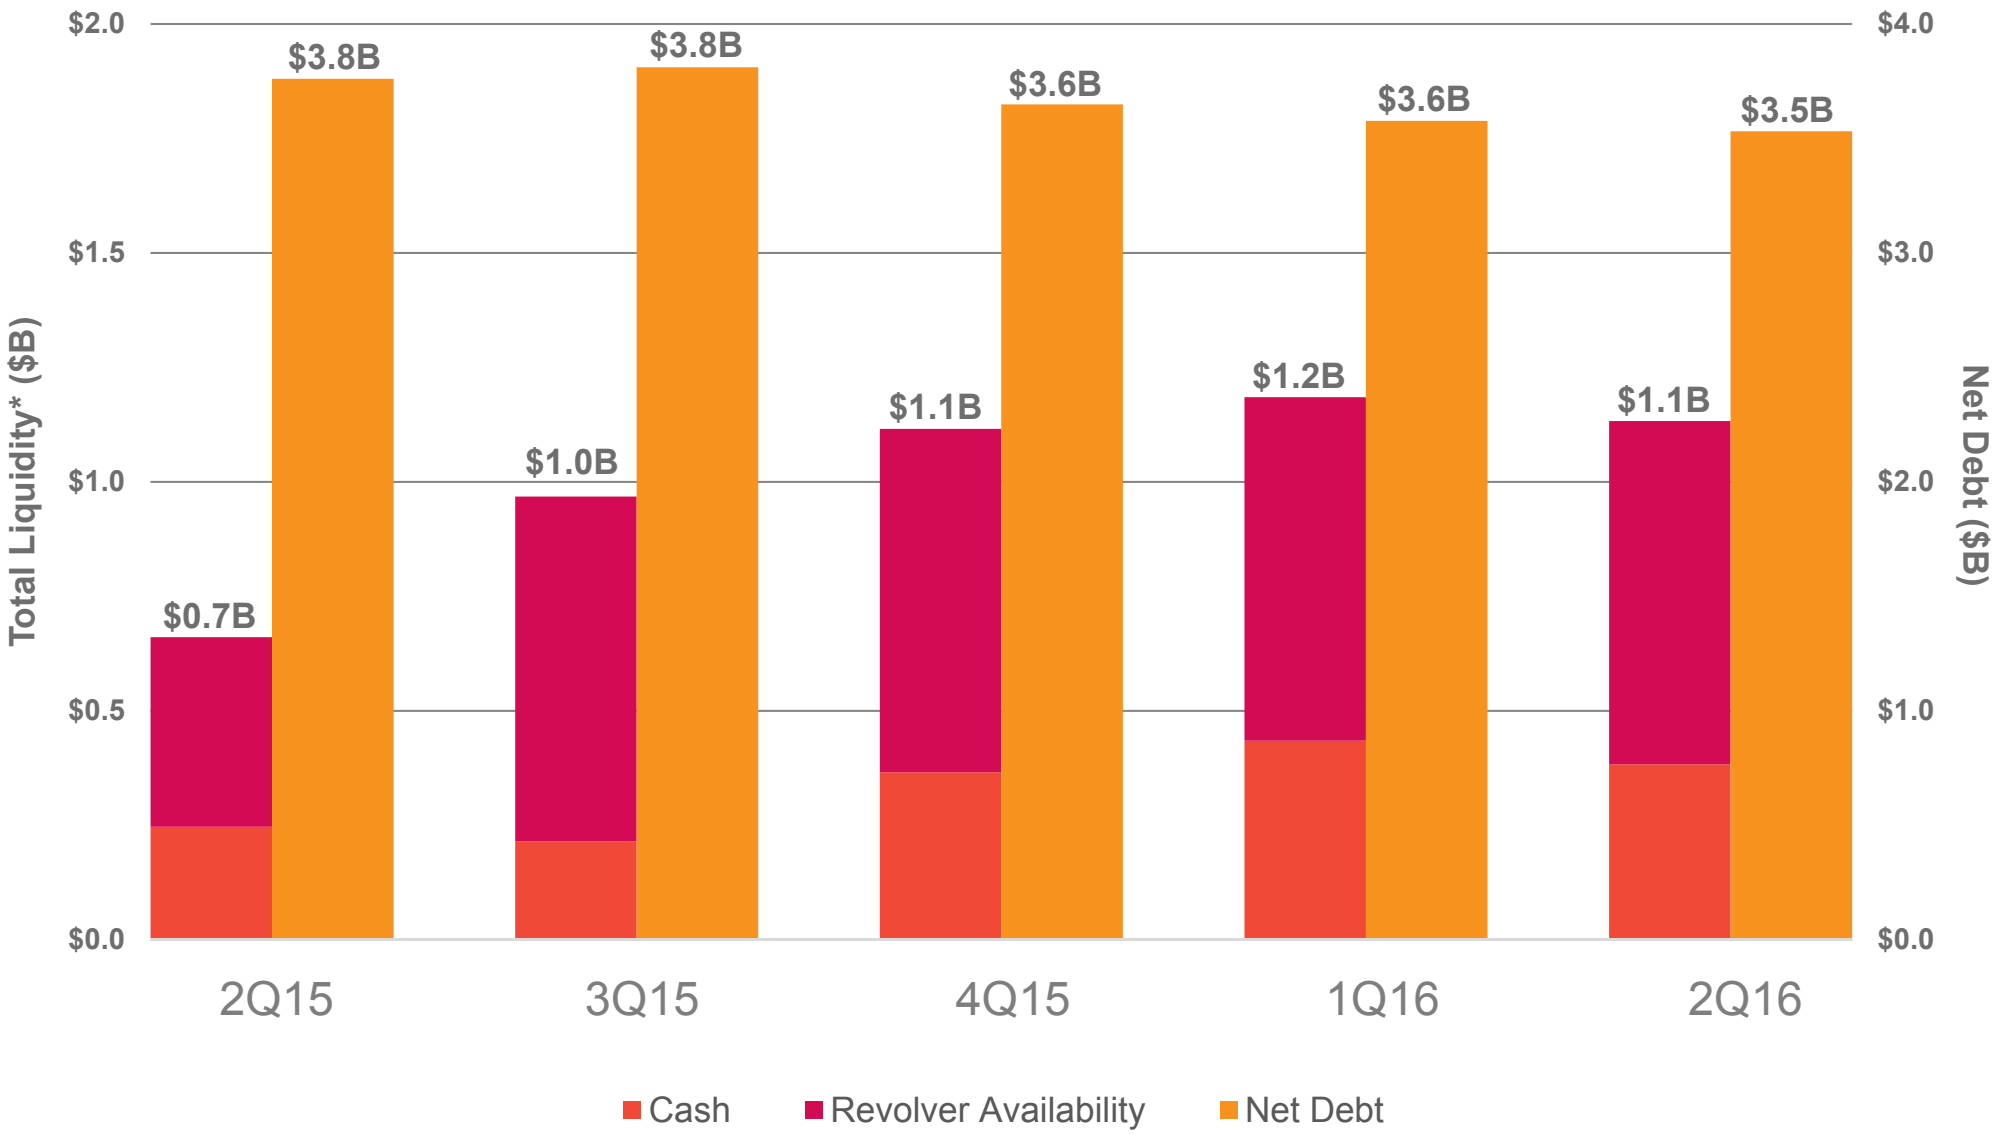
- Benefits from seasonal TiO_2 and refrigerant volumes, higher TiO_2 pricing, cost reductions and Opteon™ growth led to improved profitability

See reconciliation of non-GAAP measures in the Appendix

[1] Periods prior to 3Q15 are represented by pro forma diluted EPS

[2] Defined as Cash from Operations minus cash used for PP&E purchases; 1Q16 excludes benefit from DuPont prepayment of ~$166M as at 3/31/16

Liquidity Profile Since Spin



*Defined as cash plus revolver availability

2016 Outlook Reaffirmed

2016 Adjusted EBITDA Expected to be Greater than 2015, including $200M of Transformation Savings, Generating Modestly Positive Free Cash Flow

Key Factors Influencing 2016 Performance:

Market Factors

- TiO_2 price
- Currency
- End-market demand

Chemours Initiatives

- Cost reductions
- Working capital productivity
- Ramp up in Opteon™
- Altamira start-up

Chemours™

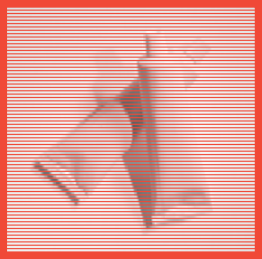
Appendix

TiO_2 Applications

Quality and performance of TiO_2 products differ considerably across segments of the market that serve different applications

Chemours Focus

- **Specialty and High Quality Applications: 40%**
  - Performance polymers, Exterior Architectural Paint, Automated Tint System Coatings and durable Industrial coatings
  - Commands premium due to superior pigment product design & performance
  - Pharma, Food and Cosmetics*



- **Multi-Purpose Applications: 30%**
  - High quality architectural paint, white, industrial coatings
  - Commands premium due to interior/exterior durability and a high level of product consistency

- **Fit for Use Applications: 20%**
  - Interior arch factory color paint, fibers, non durable polymer applications
  - Less stringent batch to batch variability requirements (lesser pigment quality needs)

- **Lowest Quality requirement Applications: 10%**
  - Ceramics, road paint

* Chemours does not participate in these applications

Chemours™
